Personal portfolio

Technical Skills

- React Js
- Express Js
- Nest Js
- Next Js
- Mongo DB
- SQL
- Git

Soft Skills

- Problem solving
- Communication
- Teamwork
- Time management

Languages

- Sinhala
- English

About Me

I am a graduate at the University of Sri Jayewardenepura with a strong passion for technology and innovation. As a skilled full-stack developer, I possess expertise in building robust, scalable, and user-friendly web applications. I thrive in collaborative environments and am eager to leverage my knowledge to drive impactful solutions

Education

Bachelor of Information and Communication Technology (Hons)(UG) *2022-2026*

Faculty of Technology, University of Sri Jayewardenepura

- Specialized in Software Technology

Experience

- **Intern Software Engineer** *2025.03.31 - 2025.09.30*

  Eyerax technology (pvt) Ltd.

Projects

- Real Time Train Tracker

  Developed a real-time Train Monitoring System using Arduino, GPS-enabled ESP32, and a full-stack web app with React, MongoDB, Express.js, and Node.js.

- B2B Mobile Recharge Distribution Platform

  B2B mobile recharge voucher distribution platform developed for an international client. The system enables secure and efficient high-frequency transactions between a central administrator and a network of overseas agents. It was designed to meet global standards for financial accuracy, security, and scalability. The platform was built using NestJS for the backend and React.js for the frontend.

- CRM & ERP System

  I developed a full-stack Customer Relationship Management (CRM) and Enterprise Resource Planning (ERP) platform for a local bespoke tailoring company to digitize and streamline their business operations. The system replaces traditional manual bookkeeping by managing the entire lifecycle of custom tailoring orders, including customer inquiries, measurement management, order tracking, production workflow and financial records. The application was built using the MERN stack.
